ADVANCED BODY TREATMENT  
ANTI-CELLULITE / ANTI-FLACCID SKIN

# BODY SCULPT

THE MOST ADVANCED PROPOSAL  
IN BODY TREATMENTS

## BODY SCULPT

Skeyndor, with 45 years experience in the professional cosmetics sector, introduces its Body Sculpt range, designed specifically for treating the whole body.

Body Sculpt is the result of research into new active ingredients that can treat the most common disorders, such as cellulite or flaccid skin. In addition, this research also considers that the professional beautician in the salon must respond to the most demanding requests of their clients who need visible, effective results.

# BODY SCULPT

DEVELOPMENTS AGAINST CELLULITE

What is cellulite?

---

Cellulite, or lipodystrophy, is an inflammation of the subcutaneous connective tissues with an accumulation of adipose tissue, normally located in some parts of the body where adipose nodules, liquid retention and toxins appear.

## ANTI-CELLULITE AND DRAINING PRODUCTS

### **GENESCULPT CELLULITE PACK**

The GENESCULPT anti-cellulite pack is an innovative reduction treatment that reduces, at source, the thickness of the adipose tissue and the associated cellulite.

The GENESCULPT formula includes Isorhamnetine (IsR), a molecule with in vitro clinical studies endorsing its ability to block the activity of stem cells resident in the fatty tissue, reducing, at source, the skin's ability to accumulate fat.

The GENESCULPT anti-cellulite pack also has a studied combination of other active ingredients aimed at accelerating the results of body remodelling, via the following action:

- Inhibiting adipogenesis, to reduce the body's ability to accumulate fat.
- Activating basal and induced lipolysis, to eliminate existing fat reserves.
- Inhibiting lipogenesis after eating, to prevent new reserves from being created.
- Activating the return microcirculation, to help eliminate the trigger elements, particularly toxins and liquids, that promote cellulite or the orange skin phenomenon.

## ANTI-CELLULITE PRODUCTS

### GENESCULPT CELLULITE PACK

#### 1. INTRODUCTORY FACTOR

Oily Hypericum perforatum extract, suitable for preventing aesthetic effects caused by status of anxiety. Stimulates the release of  $\beta$ -endorphins, producing a feeling of inner wellbeing.

**Principal ingredients:** St John's Wort (Hypericum perforatum) Ext 0.75%.

#### 2. GENESCULPT CONCENTRATE

An ionisable professional biological concentrate formulated with Oenanthe javanica extract in Isorhamnetin (IsR), a new molecule that suppresses the human adipose stem cells (hAMSCs, in-vitro). Acts on the origin of the cellulite, bringing a longer-lasting reducing effect.

**Principal ingredients:** Caffeine and caffeine deriv 5%, Carnitine 3%, Oenanthe javanica (IsR) Ext<sup>1</sup> 20ppm.

#### 3. LIPOLYSIS ENHANCER MASSAGE GEL

A heat-effect massage gel that softens the appearance of the cold areas affected by cellulite with excess deposits of fat. Its formula, with raspberry extract, helps dissolve the solid fat nodules, facilitating the mobilisation of the fatty cellulite component.

**Principal ingredients:** Raspberry (Fisetin+Frambione) Ext, Brazilian pepper (Schinus terebinthifolius).

#### 4. DRAINING ENHANCER MASSAGE GEL

A cold-effect massage gel that reduces the swollen appearance of the skin caused by fluid retention on the abdomen and legs. Formulated with Artichoke and Dandelion mother tincture, with an anti-oedema and vasoprotector effect that removes retained fluids and prevents them from reappearing.

**Principal components:** Dandelion (*Taraxacum officinalis*) 5% MT, Artichoke (*Cynara scolymus*) 5% MT, Ruscus (*Ruscus aculeatus*) 500ppm, MT Goldenrod (*Solidago virgaurea*) Ext 450ppm, Lemon (*Citrus limon*) Ext 450ppm. (Ruscus Ext + MT Goldenrod)<sup>2</sup>.

#### 1. *Oenanthe javanica* extract

**In vivo** (Ultrasonography, 15 volunteers, aged between 22 and 38, 56 days treatment, 1applic./day, 20 ppm IsR).

- Significant reduction in the infiltration of fatty tissue (-11.2%).
- Centimetre reduction in the thigh contour (-0.33 mm).

Strip projection: Significant reduction in the appearance of cellulite (-8.0%).

#### 2. Butcher's broom extract (*Ruscus aculeatus*) + Goldenrod (*Solidago virgaurea*) + lemon (*Citrus limonium*)

**In vivo** (Laser Doppler, 10 volunteers, 14 days treatment, 2applic./day, 450 ppm/ext).

- Increase in microcirculation (+31%)
- Centimetre reduction in shins (-0.5 cm) and ankle (-0.3 cm).

**Ultrasonography** (4 volunteers, 14 days treatment, 2 applic./day, 450 ppm/ext).

- Reduction in ankle oedema (-0.45 mm).

## ANTI-CELLULITE PRODUCTS

### **SCULPTING BODY CONCENTRATE. STUBBORN CELLULITE**

An ionisable professional biological concentrate for treating resistant cellulite. Indicated for hard cellulite, contains a fibrolithic agent that improves the lumpy appearance of orange peel skin. Contains caffeine and caffeine derivatives. Not recommended for pregnant women, breastfeeding mothers and people who are sensitive to caffeine.

**Principal ingredients:** Caffeine and caffeine deriv 5%, Carnitine 3%, Euglena gracilis Ext 1.5%, Glaucium flavum Ext 30ppm. (Euglena gracilis Ext + Glaucium flavum Ext)<sup>3</sup>.

### **DRAINING SCULPTING CONCENTRATE**

An ionisable professional biological concentrate formulated to improve the appearance of skins with fluid retention. Indicated for soft cellulite and to soften the contour volume.

**Principal ingredients:** Dandelion MT 10%, Caffeine and caffeine deriv 6%, Ruscus (Ruscus aculeatus) Ext 550ppm, Goldenrod (Solidago virgaurea) Ext 450ppm, Lemon (Citrus limon) Ext 450ppm.

### SCULPTING MASSAGE CREAM

A body massage cream formulated to treat aesthetic problems related with cellulite and fluid retention. An emulsion that contains raspberry extract enriched with 5% pro-vit E.

**Principal ingredients:**  $\alpha$ -DL-Tocopherol acetate 5%, Brazilian pepper (Schinus terebinthifolius)<sup>4</sup> 1000ppm, Raspberry (Fisetin+Frambione) Ext<sup>5</sup> 200ppm, Ruscus (Ruscus aculeatus) Ext 500ppm, Goldenrod (Solidago virgaurea) Ext 450ppm, Lemon (Citrus limon) Ext 450ppm.

### 3. Euglena gracilis extract + Glaucium flavum

**In vivo** (Ultrasonography, 27 volunteers, aged between 18 and 50, 56 days treatment, 2applic./day, 1.5% + 30 ppm)

- Reduction of the infiltration of fatty tissue from -16.7 to -69.0%
- Reduction of the thickness of the fatty tissue in the thigh (-8.5 to -18.6%) and knee (-8.2 to -20.0%)
- Centimetre reduction of the thigh contour, from -0.97 to -1.97 cm.

### 4. Brazilian pepper extract (Schinus terebinthifolius)

**In vivo** (18 volunteers, 28 days treatment, 2applic./day, 1000 ppm)

- Centimetre reduction of the thigh contour (-0.15 to -0.7 cm), hip (-0.7 to -2.0 cm) and waist (-0.4 to -2.2 cm)

**Laser Doppler** (10 vol., 1 applic., 1000 ppm)

- Increase in cutaneous microcirculation (+16.5%) in just 1 hour

### 5. Raspberry extract (Fisetin+Frambione)

**In vivo** (Ultrasonography, 15 volunteers, 56 days treatment, 2applic./day, 1000 ppm)

- Reduction (in 93% volunteers) of the thickness of the fatty tissue in the thigh (from -0.03 to -0.07 mm)
- Centimetre reduction in the thigh contour, from -0.3 to -1.0 cm.
- Silicone replicas: Improved appearance of orange peel skin, from 4.6 to 39.5%
- Cutometry: Significant improvement in skin elasticity, from 13 to 48%

## ANTI-CELLULITE PRODUCTS

### INTENSIVE SCULPTING SILHOUETTE

A reducing shock treatment for obtaining rapid remodelling results. Intensive formula prepared with tested anti-cellulite and draining agents.

**Principal ingredients:** Dandelion MT 5%, Caffeine and caffeine deriv 3%, Carnitine 3%, Ruscus (Ruscus aculeatus) Ext 550ppm, Goldenrod (Solidago virgaurea) Ext 450ppm, Lemon (Citrus limon) Ext 450ppm, Lotus (Nelumbium speciosum) Ext<sup>6</sup> 340ppm.

### GENESCUPT CELLULITE CREAM

An anti-cellulite cream formulated with Oenanthe javanica extract in Isorhamnetin (IsR), a new molecule that suppresses human adipose stem cells (hAMSCs, in-vitro). Act at the source of the cellulite, to obtain a longer-lasting reducing effect.

**Principal ingredients:** Caffeine and caffeine deriv 2.5%, Oenanthe javanica (IsR) Ext 20ppm, Brazilian pepper (Schinus terebinthifolius) Ext 1000ppm, Buckwheat (Polygonum fagopyrum) 300ppm, Ruscus (Ruscus aculeatus) Ext 500ppm, Goldenrod (Solidago virgaurea) Ext 450ppm, Lemon (Citrus limon) Ext 450ppm, Centella asiatica Ext 0,1%.

#### **6. Lotus extract (*Nelumbium speciosum*)**

**In vivo** (Thermography, 23 volunteers, aged between 32 and 54, 28 days treatment, 2 applic./day, 340 ppm)

- Increased drainage effect (+29%) after 4 weeks in 74% vol.
- Centimetre reduction of the thigh contour (65% vol, -0.4 to -2.0 cm), hip (71% vol, -1.3 to -4.5 cm) and waist (88% vol, -1.6 to -5.0 cm).
- Clinical scoring: Improved appearance of the orange peel skin (+6.0%) in 68%vol.

## DEVELOPMENTS AGAINST FLACCID SKIN

---

What is flaccid skin?

Obesity, repeated pregnancies, very sudden weight loss or a sedentary lifestyle, are some of the factors that make the skin lose its firmness and tautness.

Flaccid skin on the body is the result of deep, morphological changes experienced by the tissues and which are caused by the passage of time, and accentuated by some adverse circumstances (poor diet, smoking, extreme external conditions, etc.).

When the complex support structure (elastin, collagen and fundamental substance) which makes the epidermis and dermis appear perfectly joined, becomes weaker, disconnection occurs between the two layers, and consequently, areas of flaccid skin appear.

# BOOTH TREATMENT PRODUCTS

## REAFFIRMING AND REMODELLING PRODUCTS

### **FIRMING-STRETCH MARKS CONCENTRATE**

An ionisable professional biological concentrate formulated to improve the appearance of skin with stretch marks and/or evident signs of sagging. Lifting effect. Helps attenuate/weaken the process that causes stretch marks and sagging caused by age, pregnancy or slimming diets.

**Principal ingredients:** Organic silicon (Methylsilanol mannuronate) 0,09%<sup>7</sup> 5%, Yucca (Manihot esculenta) Ext<sup>8</sup> 0,4%, Clorella (Chlorella vulgaris) Ext<sup>9</sup> 450ppm.

### **FIRMING-STRETCH MARKS MASSAGE CREAM**

A body massage cream formulated to treat aesthetic problems associated with stretch marks and sagging skin. Multivitamin formula with mango butter.

**Principal ingredients:** Organic silicon [Methylsilanol mannuronate]<sup>7</sup> 900ppm, Pro-vit B5 (Dexpanthenol) 1%, Pro-vit C (Ascorbyl glucoside) 0,25%, Pro-vit E+F (Tocopheryl linoleate) 0,125%, Pro-vit A (Carotene) 25ppm.

## PREPARATION AND CARRIER PRODUCTS

### GLYCO-30

A professional biological product for intensive exfoliating treatments. Its high alpha hydroxy acid (AHA) content adds moisture and radiance to the skin, accelerating the elimination of dead cells. Not recommended for sensitive skins. Avoid exposure to the sun, risk of photosensitisation. FOR PROFESSIONAL USE ONLY. Contains glycolic acid or  $\alpha$  hydroxy acids. Do not apply to the eyes or mucous membranes. Stop using it in the event of irritation.

**Principal ingredients:** Glycolic ac. (sol. 75%) 30%.

### UNIVERSAL ELECTROTHERAPY GEL

A universal gel for electro-cosmetic treatments, designed to conduct electricity, ultrasound and diathermy. Non-irritant or oily, essential in any beauty institute or electro-cosmetic centre.

**Principal ingredients:** Glycerin 10%, Sorbitol 5%, Potassium Citrate 1%.

### 7. Organic silica (Methylsilanol mannuronate)

**In vivo** (Clinical scoring, 20 volunteers, aged between 35 and 55, 28 days treatment, 2 applic./day, 3600 ppm)

- Reduction (-20%) in the appearance of wrinkles (crows' feet).

### 8. Yuca extract (Manihot esculenta)

**In vivo** (In-use: 18 volunteers, 1 application, 0.4%)

- Immediate lift reaffirming effect, (after 10min, +85.7% vs placebo, in 90%vol).

- Cutometry: Increase in dermal elasticity in 72% vol.

### 9. Clorella extract (Chlorella vulgaris)

**In vivo** (11 volunteers, aged between 25 and 35, 84 days treatment, 2applic./day, 450 ppm)

- Balistometry: Significant increase in the 73% of volunteers, in dermal firmness and tone (10.5% to 46.7%).

- Polarised photograph: Reduction in 73% of volunteers, in the area [-2.9 to -7.9%] and colour [-10.4 to -32.1%] of stretch marks.

# HOME TREATMENT PRODUCTS

## REAFFIRMING PRODUCTS

### **ABDOMEN SCULPTING EMULSION**

An emulsion specially formulated to soften the swollen appearance of the abdomen and slim the waist. Reducing formula with cupuacu butter.

**Principal ingredients:** Artichoke (Cynara scolymus) RE 5%, Caffeine and caffeine deriv 2%, Brazilian pepper (Schinus terebinthifolius) Ext 1000ppm, Yucca (Manihot esculenta) Ext 0,2%, Phyllacantha fibrosa Ext<sup>10</sup> 750ppm, Corallina officinalis Ext<sup>11</sup> 55ppm.

### **BUST SCULPTING EMULSION**

A special emulsion for gradually and naturally adding volume to and toning the skin of the bust. With a lifting-tensor effect. Formulated with shea butter and without phytohormones.

**Principal ingredients:** Creatine 0.6%, Yucca (Manihot esculenta) Ext 0,4%, Dictyopteris membranacea Ext<sup>12</sup> 30ppm, Anemarrhena asphodeloides Ext<sup>13</sup> 20ppm.

### **FIRMING-STRETCH MARKS EMULSION**

An emulsion specially formulated to prevent and soften the appearance of stretch marks and attenuate/weaken signs of sagging skin. Multivitamin formula enriched with cupuacu butter.

**Principal ingredients:** Organic silicon (Methylsilanol manuronate) 2700ppm, Spilanthes acmella Ext<sup>14</sup> 590ppm, Pro-vit B5 (Dexpanthenol) 1%, Pro-vit C (Ascorbyl glucoside) 0,25%, Pro-vit E+F (Tocopheryl linoleate) 0,125%, Pro-vit A (Carotene) 25ppm, Yucca (Manihot esculenta) Ext 0,4%, Clorella (Chlorella vulgaris) Ext 450ppm, Centella asiatica Ext<sup>15</sup> 0,1%.

#### 10. *Phyllacantha fibrosa* extract

**In vivo** (Strip projection: 17 volunteers, aged between 50 and 55, 28 days treatment, 2 applic./day, 750 ppm)

- Reduction in the abdominal volume, -4.3% to -18.3%.

#### 11. *Corallina officinalis* extract

**In vivo** (Ultrasonography, 17 volunteers, between 35 and 55 years old, 28 days treatment, 2 applic./day, 110 ppm)

- Reduced thickness of the fatty tissue, from -0.5 to -2.6 mm, and visible improvement in the orange skin.
- Centimetre reduction in the contour of the buttocks (-0.2 to -0.8 cm) and waist (-0.3 to -1.7 cm).
- Cutometry: Significant increase in dermal firmness and tone.

#### 12. *Dictyopteris membranacea* extract

**In vivo** (Strip projection, 17 volunteers, aged between 25 and 40, 28 days treatment, 2 applic./day, 100 ppm)

- Increased breast volume (in 69% vol.), from 1.5 to 11.4%.

#### 13. *Anemarrhena asphodeloides* extract

**In vivo** (Strip projection, 30 volunteers, between 18 and 35 years old, 28 days treatment, 2 applic./day, 20 ppm)

- Increased breast volume, from 1.4 to 6.6%.

#### 14. *Spilanthes acmella* extract

**In vivo** (Profilemetry laser, 28 volunteers, between 45 and 65 years old, 28 days treatment, 2 applic./day, 590 ppm)

- Reduced surface (-36% to -51%) and depth (-20 to -28%) of wrinkles on day 1.

#### 15. *Centella asiática* extract

**In vivo** (Clinical scoring, 80 expectant women, week 13 to 30, 2 applic./day)

- Preventive action on new stretch marks during pregnancy in 89% of volunteers with puberal case history.

**Biopsies** (35 volunteers, over 3 months, 60 mg/day)

- Reduced cellulite fibrosis in saddlebags in 85% of volunteers

# HOME TREATMENT PRODUCTS

## SKIN MOISTURISING AND PROTECTION PRODUCTS

### VELVET HYDRATING BODY EMULSION. NORMAL SKINS

An essential body emulsion for protecting and conditioning the skin, maintaining optimum skin hydration.

Formulated with xylitol and xylitol derivatives, a new generation of moisturisers that structure and harmonise the skin's natural hydrodynamics. Enriched with cupuacu butter.

**Principal ingredients:** Xylitol and xylitol derivatives<sup>16</sup> 2.5%.

### CARESSE MOISTURIZING BODY CREAM. DRY SKINS

A body cream rich in moisturising agents which protects and cares for dry, unprotected skins.

Formulated with xylitol and natural extracts with a sustained effect that moisturise the skin, consolidating its barrier function and recovering its natural hydrodynamics.

**Principal components:** Xylitol and xylitol derivatives 2.5%, Beetroot (Beta Vulgaris) Ext 1%, Corn (Zea Mays) Ext 1%. (Ext Beetroot + Zea Mays)<sup>17</sup>.

#### 16. Xylitol and derivatives

**In vivo** (25 volunteers, 28 days treatment, 2 applic./day, 2.5%)

- Corneometry: Significant increase in leg hydration (+12%)
- Evaporimetry: Reduction in the insensible water loss (-12%)
- D-squame: Improvement in cutaneous scaling (+25%)
- Microcamara: Improvement in skin micro reliefs (+30%)

#### 17. Beetroot extract (Beta Vulgaris) + Corn Starch (Zea Mays)

**In vivo** (Chromametry, 20 volunteers, aged between 25 and 57, 1 applic., 1%/ext.)

- Significant increase in hydration over 24 hours.

**In vivo** (Raman Confocal Microscopy, 4 volunteers 1 applic., 1%/ext.)

- Significant increase in FNH in surface and corneous depth over 24 hours.
